information space

Within the library area of City University, a double height rectangular space of 450sq.m converts into a place for students to study, get information or group interaction.

Three focal elements changes the doughy campus ambience – Up front are the help-desk and an 'I-café' with groups of

armchairs armed with foldable tablet. Beyond the 'I-Café' is a 'Drum' of 10mdia, constructed with metal panels and glass partitioned off as function room. Further down is the 'Ring' - a 10mdia illuminant circle hanging above the open space computer tables. The inner face of the Ring serves as projection screen for the projectors that was housed inside a UFO-like dome. The skylight effect uplifts this space for studying too.

资讯空间

本案位于城大图书馆内，设计旨在把这个占地 450 平方米、拥有双倍层高的矩形空间转换为一个学生学习、获取资讯和团体交流的地方。

三大关键设计元素改变了以往大学给人的苍白氛围：最前面的咨询台和咖间设置有一组扶手椅和折叠薄板；在离咖间不远的地方是一个直径十米的“鼓”，用金属面板和玻璃隔断作为功能房；更远的地方有个直径十米的光“环”，它悬挂在开放的计算机桌空间之上，环内面板仿佛一个飞碟圆顶，可在必要时作放映机的屏幕。天窗的效果同时也提升了学习的氛围。
